RECOMMENDATIONS FOR USE

- It is the responsibility of the end user and not the manufacturer to determine glove suitability for the intended use. These gloves resist cuts but are not cut proof.
- Do not subject to high speed or serrated blades.
- Do not use near moving machines if there is a risk of entanglement.
- Storage: Gloves should be ideally stored in cool, dry conditions in original packaging and away from direct sunlight.
- Cleaning/Maintenance: Both new and used gloves should be thoroughly inspected before being worn to ensure no damage is present. Gloves should not be left in contaminated condition if re-use is intended. Not recommended for washing or cleaning as the performance characteristics may differ to washed or cleaned gloves.
